

MFA questions require the player to find the key to insert into the flag format: `ahoy{xxxx}`  
(not the flag itself)

### MFA Part 1: CTF (Comprehend The Flags)

**Tools:** `dcode.fr` semaphore translator.

The image is named “semaphore.jpg”, which is the name for the flag communication language. Googling semaphore will bring up the alphabetical representations for each of the poses. You can also use the semaphore decoder from `dcode.fr`.

This will translate to FLORIDA  
So the flag is **`ahoy{FLORIDA}`**
